

## Tonga s superior capacitors are worth recommending

Some dirt cheap crap board doesn't worth the effort and the shipping price. I'm sure that all of these are generic &quot;brands&quot;; I've tested some of the capacitors. They behave a ...

The capacitors must be physically small, none microphonic, none inductive, ...

But also I'm not sure if I should even get an overflux. I'm thinking about buying either maxed 50m midas or superior, but I'm afraid the value of superior might dip a bit when dungeons finally ...

Dielectric capacitors and electrolytic capacitors are two common conventional capacitors. The medium of a dielectric capacitor is a dielectric material, which relies on the ...

i compare a zn Mundorf with a Superior-z Jantzen in a tube buffer right now. The jantzen is really smooth and more natural sound. Mundorf love highs and edges, dynamics ...

????????&quot;worth recommending&quot;; - ??????8??????????????

though expensive, it was well worth it!! The caps have upwards of 700 hours of ...

The capacitors must be physically small, none microphonic, none inductive, free of thermal drift, and available at tight and consistent tolerances at rational prices. There ...

Some dirt cheap crap board doesn't worth the effort and the shipping price. ...

Is there any measurable performance between Mundorf "E" cap and Jentzen superior Z capacitors. Or in other words, is it worth spending the extra money and if so why? ...

The capacitors must be physically small, none microphonic, none inductive, free of thermal drift, and available at tight and consistent tolerances at rational prices. There seem ...

Jantzen Audio 3.3uF 800V Superior Z-Cap Crossover CapacitorProduct FeaturesDimensions: (&#216; 30mm - L: 45mm)The Superior-Z Cap offers extremely high performance, but still at a reasonable price point.Highly recommended for ...

Time to recap the Intinity QLS-1"s and would like to get a little fancy with the ...
