

Uruguay Energy Storage Subsidy Policy Document Announcement

What is the energy policy of Uruguay?

Uruguay's energy policy, as outlined in the National Energy Policy 2005-2030, aims to diversify the energy mix, reduce dependency from fossil fuels, improve energy efficiency, and increase the use of endogenous resources, mostly renewables. The overall objective is to reduce dependency from fossil fuels and increase the use of renewable energy sources.

Does Uruguay have a solar energy policy or plan?

Uruguay established the Solar Plan (Decree 50/012) in 2012 to increase the use of solar energy for water heating in households. The plan offers optional five-year financing on a non-for-profit basis from the public mortgage bank (BHU), with payments included in the electricity bill.

How does the electricity grid function in Uruguay?

In Uruguay, access to the electricity grid is provided by UTE, which also issues the contracts supported through auctions, net-metering, and feed-in schemes, and is regulated by the regulatory agency URSEA. Renewable electricity is exempt from grid charges for the duration of the PPAs.

Is it legal to use solar hot water in Uruguay?

Renewable energy heating legislation in Uruguay includes mandates for solar hot water (Law 18585 and Decree 451/011).

How do electricity auctions work in Uruguay?

In Uruguay, the government-owned national electric company (UTE) awards power purchase agreements (PPAs) to successful bidders through electricity auctions. All auctions are subject to a bidding guarantee of 1% of the expected 10 year income.

How does water heating work in Uruguay?

In Uruguay, most domestic water heating is done by electric boilers. It is estimated that water heating accounts for over one third of household energy consumption. Water heating in Uruguay is a significant energy consumption area. In 2012, Uruguay established the Solar Plan (Decree 50/012) with the objective of increasing solar water heating in households.

Uruguay has a comprehensive, long-term energy plan: The National Energy Policy 2005-2030. The overall objective of this plan is to diversify the energy mix, reduce dependency from fossil ...

FRAMEWORK AND HISTORICAL BACKGROUND (before 2005) Uruguay has no proven reserves of oil, natural gas or coal No access to natural gas in the region No space ...
