What is traceability & why is it important in the EV industry?

Traceability is a topic we're beginning to hear a lot about in the EV industry. The term refers to a process for documenting the source of a product, along with all the links in the supply chain, and it has long been important in various industries.

Are internal traceability systems connected to government agencies?

Ken Fallu: The internal traceability systems are not connected to any government agencies, they operate within their own boundaries. Our solution presents an independent view, tracking and tracing all the material from the source--from the mine to the battery, and this information can be uploaded to a government agency so it can be validated.

How can a battery supply chain be more sustainable?
