

# What to do if your home solar panel explodes

What should you do if a solar panel fire starts?

Contact firefighters and evacuate the area, maintaining a safe distance. Never attempt to extinguish the fire yourself due to potential electrical hazards. Inform the firefighters about the presence of solar panels so they can take necessary precautions. Firefighters may use firefighting foam or water to suppress the fire and prevent its spread.

How to fix a broken solar panel?

The first step is to identify the broken solar panel. Once you have found the broken solar panel, you will need to remove it from the system. To do this, you will need to disconnect the power from the solar panel and then remove the screws that are holding it in place. Once the solar panel is removed, you can now proceed to the next step.

Why do solar panels explode?

That said, there are some very real cases of explosions linked to solar inverters, isolators and hot water systems, usually related to one of three reasons: 1. Low quality inverter explosions. In a standard solar system, panels themselves aren't at risk of exploding.

What should I do if my solar meter is faulty?

Contact your solar panel installer or a solar panel maintenance professional. If your generation meter is replaced, make sure you get a letter from the installer stating what they have done and that they changed the meter because it was faulty. The paperwork should also state the model and serial numbers of the old and new meters.

Can solar panels catch fire?

Whilst the risk of solar panel systems catching fire is extremely low, like any other technology that produces electricity, they can catch fire.

How do I protect my solar panels from theft & vandalism?

Implement a system whereby solar panels are regularly cleaned by a suitably trained person, paying particular attention to bird droppings and the build-up of litter and leaves around or beneath PV panels. Ensure that sufficient protection measures for the prevention of theft and vandalism are provided.
