

# What tools are there to clean solar panels

What are the best solar panel cleaning tools?

And now on to some of the equipment that you may need to have on hand when cleaning your solar panels, and some of our picks for the best solar panel cleaning tools to buy...Brushes and poles are going to be your bread and butter solar panel cleaning tools.

Why should you buy solar panel cleaning tools?

Pollen, dust in the air, smog, bird droppings, leaves and more can all find their way to your panels and start to create problems. Because you probably didn't rush out to buy solar panel cleaning tools on the first day of your installation, now is the time to consider getting the right tools for that cleaning job.

How do solar panel cleaning tools work?

Generally speaking, solar panel cleaning tools consist of a long, telescoping (extendable and retractable) pole with a brush at one end and an easy-grip handle at the other. Some of these tools can be connected to a hose or outdoor faucet so that you can pump water through the pole and out at the brush end to enhance the tools' cleaning potential.

What is the best solar panel brush & cleaning tool?

If you're looking for the very best solar panel brush and cleaning tool your money can buy, then look no further. The EQUIPMAXX water-fed pole is made from aerospace-grade aluminium, and has sturdy brass fittings allowing you to securely attach your outdoor faucet or hose, with which you can then wash, brush and clean your panels in one.
