

# When charging the battery

Is it difficult to charge a car battery?

Providing the battery is not excessively past its expected life cycle, with the right equipment, charging a car battery is not difficult. From this step-by-step guide, you can confidently charge your car battery both safely and efficiently. Remember you should never be charging a car battery if it is leaking or damaged.

How long does a car battery take to charge?

Depending on the age and model of the car battery, it will take between 10 and 24 hours to perform a full charge. Trickle chargers can take significantly longer, which means you may be waiting two or three days for the battery to completely recharge.

How do I charge a car battery?

If you are unsure what the problem is, visit your trusted local garage. To charge a car battery, you will need your toolbox and follow some safety precautions. Park your vehicle in a well-ventilated area - not in your garage - and make sure that the engine is turned off. Use either a trickle charger or a smart charger.

When should a car battery be charged?

Frequent short trips, stop-and-start traffic, sub-zero temperatures and additional electrical loads have reduced the starting power of your battery. To avoid a total battery failure, you should charge the battery in the spring and autumn at least. It is best to always combine external charging with changing the tyres.

How to charge a car battery safely?

Ensure good ventilation when charging in enclosed spaces. If the battery is removed from the engine compartment for charging, a second person should help to lift large batteries due to the heavy weight. Important: With lead-acid batteries, the formation of explosive hydrogen and de-gassing must be expected during charging.

Can You charge a car battery without taking it out?

Most of the time you will be able to charge the battery without taking it out of the car, but if reaching the battery or fitting the charging cables in the engine bay or trunk where the battery is located proves difficult, remove the battery from the car completely while you charge it.
