

Where to display the date on lead-acid batteries

How do I know if a battery has a date code?

Battery Mfg. Co. Date Codes Date codes are found on all U.S. Battery products indicating the month, year, and factory flooded Lead Acid Batteries: For flooded lead acid batteries, the date code is stamped on the positive terminal using two letters and a number. The first letter refers to the month it was manufactured: A-L ref

What is a battery date code chart?

The battery date code chart is a tool that allows you to determine the date of manufacture for a given battery. The date code is typically stamped on the battery itself, and can be used to determine the age of the battery.

How do you know if a lead battery has an expiration date?

Lead batteries often have a date printed or engraved in the plastic, with the notation being either MM/yy or AA/MM depending on the brand and model. There is a date, but it doesn't indicate an expiration date for lead batteries. Self-discharge is important for lead batteries, and it depends on the temperature and place of storage.

How do I check the date on my Exide Battery?

To check the date on your Exide battery, all you need to do is find the small white sticker on the top of the battery. This sticker will have a bunch of numbers and letters on it, and the date will be listed as DD/MM/YY. For example, if the date on the battery is 01/04/19, that means the battery was manufactured on April 1st, 2019.

How do I know if a battery was made?

For example, if the date on the battery is 01/04/19, that means the battery was manufactured on April 1st, 2019. If you can't find the sticker, or if the date on the sticker is illegible, you can also check the date code stamped into the side of the battery case. This code will be four numbers followed by two letters.

Why are battery date codes important?

Battery date codes are more than just random strings of characters; they are essential for several reasons: Batteries, especially those used in critical applications like vehicles or medical devices, degrade over time. An outdated battery can fail unexpectedly or, worse, cause safety hazards.

Date Coding of batteries for stock rotation purposes. A -Storage. ... These testers show whether the battery is in a good, charged condition, whether it is discharged or whether it needs ...
