

Which battery is the best and most environmentally friendly

Are rechargeable batteries good for the environment?

Also, rechargeable batteries offer an alternative to single use batteries, which are bad for the environment when discarded. When it comes to batteries, switching to rechargeable batteries is the sustainable way forward. Eco-friendly customers should do their research to find the best rechargeable batteries to limit their environmental impact.

Are rechargeable batteries eco-friendly?

Rechargeable batteries are a great way to reduce your carbon footprint as they save on resources by being reusable. Therefore, switching to these batteries should be part of your strategy to live an eco-friendly life. All you need is a suitable battery charger to be able to make the most of your batteries.

Are lithium ion batteries a good choice?

They have a lower voltage than what is currently available. Lithium Ion batteries are mostly used for electric cars, iPhones, and portable electronics. These batteries are powerful and efficient, making them currently the most preferable choice. However, they are considerably more expensive than the other types of rechargeable batteries out there.

Are there Best Buys for batteries?

There are no Best Buys for batteries. We are only recommending rechargeable batteries because of the financial and environmental cost savings. Varta's Recharge Accu Recycled AA and AAA batteries have the highest level of recycled content, score joint highest on the table and are Nordic Swan-certified. Its other rechargeables score well too.

What type of battery should I buy?

You can buy AA and AAA lithium batteries (all the brands except Philips, Rayovac and Duracell) but you are most likely to see them as button or coin cells for things like watches. They are more expensive than alkaline batteries. Disposable zinc air batteries are a popular choice.

What types of batteries are covered in this guide?

This guide covers household batteries like AAs and AAAs, as well as button cells and hearing aid batteries. It does not cover lithium-ion (Li-ion) battery packs for laptops and mobile phones, or car batteries. All the brands also make powerbanks and battery chargers for rechargeable batteries.
