

Winter solar collector maintenance

Are solar panels safe in winter?

Removing snow is key. While the efficiency of solar panels drops in winter, proper snow removal techniques can help keep this loss to a minimum. That being said, handling panels carefully during maintenance is crucial to avoid voiding warranties or insurance coverage. Are you using the safest methods to protect your panels?

Do solar panels work in the winter?

The sun often melts snow on solar panels faster than you might expect, quicker than on the ground or roofs. Even partially clearing the panels can improve their efficiency, particularly when they're heavily covered. Check out this blog to learn more about how solar panels work in the winter:

How often does a solar installer perform thermal maintenance?

The thermal maintenance of an installation is carried out by a solar installer once a year, at which time he: Verifies the water pressure by using the pressure gauge to ensure that it is not less than 1 bar.

How often should solar panels be cleaned?

The cleaning may be combined with preventive maintenance of the solar collectors. Solar panel maintenance: this refers to technical maintenance carried out by a professional and should ideally take place once a year. The reason why photovoltaic panels must be cleaned is to ensure solar panel efficiency.

When is the best time to clean solar panels?

There is no optimal period to clean one's solar panels. However, the end of winter seems to be a more favorable time to clean them because the sun returns and output levels are on the rise. Bear in mind that your solar installer may be very busy during this time since it is also the ideal period to perform installations.

Should I ask my solar installer to clean my panels?

As a matter of fact, you may also ask your solar installer to clean your panels while he is performing routine technical maintenance. He can execute this task in complete security. Preventive maintenance involves booking an appointment with your solar installer to verify that everything is in order.
