

Can energy projects make Croatia greener?

Several energy projects aim to make Croatia greener, ensure a secure energy supply, and improve lives in Zagreb. Just eight kilometres from the Kastel Benkovic, a medieval castle, the village of Korlat produces one of the finest red wines in both Croatia and Europe.

How will Zagreb's new power plant work?

By generating 150 megawatts of electricity and 114 megawatts of heat, the new power plant will provide reliable heat to the northwestern part of Zagreb and electricity to the national grid. This is particularly important in times of serious electricity and heat supply interruptions.

Does Croatia have a national energy and Climate Plan?

To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan. The national strategy aims at a 36.4% share for renewable energy by 2030 and significant investment across the energy sector, including hydropower, wind farms, solar photovoltaic plants, and hydrogen energy.

Will EL-to Zagreb replace old oil and gas plants?

"EL-TO Zagreb will replace old oil and gas plants, which perform poorly and don't comply with the European environmental regulations," says Jacek Podkanski, a senior engineer at the European Investment Bank. "The new power plant will make use of advanced, yet well-proven technology, decreasing pollution levels and increasing energy efficiency."

How will the European Investment Bank support Croatia's green transition?

The European Investment Bank will continue to support Croatia's green transition. With the REPowerEU initiative, the Bank will provide an additional EUR30 billion in energy loans and equity financing for high impact energy projects EU-wide over the next five years--on top of our regular lending.

How much electricity does Croatia produce a year?

The power plant produces around 170 gigawatt hours annually. That's about 1% of Croatia's annual electricity consumption and energy for more than 50 000 households. Headquartered in Zagreb, Hrvatska Elektroprivreda d.d. (HEP) is behind the construction and operation of the wind farm.
